

CLEAN ENERGY FELLOWS

Educators fostering the clean energy leaders of the future

REGIONAL FELLOWS

Foster energy leadership centered around local workforce opportunities through a customized Action Plan. Fellows collaborate and consult with their cohort and CE to build capacity and implement broad regional programming.

ELECTRIC VEHICLES

Collaborate with a small cohort of teacher leaders and subject matter experts to develop rigorous, replicable electric vehicle curriculum. Fellows test and refine programming, sharing insights nationwide as recognized leaders in this space.

WATER POWER TECHNOLOGY

Contribute to a regional network focusing on building the next generation's water power workforce, committed to ensuring principles of equity and resiliency drive future growth.
