

☐ **I can** make observations to provide evidence that energy can be transferred from place to place by sound, light, heat, and electric currents. (4-PS3-2)

=====

Solar Cell Lab 1

Name _____

Date _____

Observations

What happened when you attached the solar cell to the pump?

Evidence

What **evidence** do you have that energy is being transferred from place to place? Remember, your evidence is something you can see, feel, taste, smell or hear.

Conclusions

What **conclusions** can you make about what is happening and why? Where does the energy start? Where does it go? What form is it in at different times? Does it change form?

Conclusions are educated guesses based on your evidence and what you know about the topic from reading and talking with experts.
