

Student Instructions for Wheel Installation

MATERIALS NEEDED FROM STUDENT KIT:

8 Plastic tubing pieces (to be used to hold the axles in place)
4 Red plastic wheels (2 larger, 2 smaller)
4 Black rubber o-ring tires
2 Wooden dowels

Instructions:

1. Slide a dowel through two of the eyehooks underneath the chassis of the car body.
2. Slide on a piece of plastic tubing to secure the dowel. Repeat with the other side.
3. Slide the larger gear on to the outside of one side of the dowel. Add a larger red wheel and tire.
4. Place a piece of plastic tubing on the outside of the wheel to secure it. Repeat with the other side.
5. Place the front wheels on the same way (with no gear on one side).
